

BAMBACH SADDLE SEAT

Assembly with Footring Option

- 1. Place the base on the floor.**
- 2. Loosen the knob on the footring.**
- 3. Place the footring on the base.**
Do not place the lift on the base first and then try to put the footring on the lift. The footring will not slide easily over the portion of the lift where the lift label is attached.
- 4. Insert the lift into both the footring and the base from above.**
- 5. Raise the footring to the desired height and tighten the knob.**

Use the footring at a height within the lower half of the lift column. It will not hold securely if adjusted too high.
