Guarantee:

For full terms and conditions, please consult the warranty section of our web-site: varierfurniture.com/guarantee. Varier offers an extended warranty to customers who register their products in our product database.

The warranty is limited and covers only manufacturing defects and does not cover misuse, normal wear and tear and defects caused by exposure to sunlight. Wrinkling due to the natural properties of leather/fabric is a natural process and does not constitute a reason for reclamation.

Measurements:

Width x Depth x Height

Welcome to active sitting

The human body is the ultimate movement machine.

With more than 360 joints and 640 muscles, our bodies are made to move. Movement is central to all human activity. When we move, we thrive.

Our sedentary lives

For many of us, our way of life requires that we sit for long periods at a time. In fact, we spend about eight hours a day sitting. At work, at home, at meetings, during travel, and in the classroom. And when we sit, we tend to sit still.

Our movement solution

Our bodies are made to move. To tilt, rock, turn, pivot, extend, and flex. At Varier, we design chairs that enable your body to move. By doing so, we take some of life's passive moments and make them active. That means more time each day to engage and strengthen your back. That is sitting the way nature intended.

Active sitting

Active sitting inspires continual, controlled movement. Our body intuitively seeks the ideal position, and the next position is always the best. Active sitting means our whole bodies are engaged and in motion, which reduces stress and increases circulation. The result is we feel stronger, healthier, and our concentration improves.

The History of Varier

Varier designs and manufactures chairs that move with your body.

With roots in the Norwegian company Stokke – renowned for the Tripp Trapp high chair – Varier was formed when the 'Movement by Stokke' range became an independent business.

Movement is a central design element of every Varier chair. The Varier range includes iconic chairs such as the Variable[™] balans®, the original kneeling chair designed by Peter Opsvik in 1979. Varier continues to work closely with leading ergonomic designers to create chairs that rethink sitting.

Based in Oslo, Norway, Varier chairs can be found in the homes, offices, clinics and educational institutions of over 40 countries around the world.

Rethinking Sitting

The first chair to successfully challenge conventional sitting habits, Variable[™] balans® set new standards in chair design and functionality when it came to market in 1979. Designed by Peter Opsvik, Variable balans inspires movement. It's the iconic kneeling chair.

A Norwegian industrial designer, Opsvik questioned the notion that there is just one correct sitting posture. Unlike his peers, Opsvik believed that our body intuitively seeks the ideal sitting position – the next position is always the best – and it's this freedom of movement that defines Opsvik's designs.

The seat gently tilts the pelvis forward and encourages a natural, dynamic and upright spine. The muscles in the abdomen and back engage to keep the spine upright and the body balanced, which strengthens core muscles and prevents back and shoulder tension. The angle between the upper and lower body increases, greatly improving circulation. As the body moves from an active to a relaxed posture, the flexible runners respond with a gentle pendular motion. An optional backrest provides further support, if necessary.

Quickship Available:

Natural Base in Black Step

- When leaning forward to actively work, the pelvis tilts forwards which keeps the spine in its upright, dynamic posture and the body balanced. This subtle activity strengthens core muscles and prevents back and shoulder tension.
- The open posture enables deep breathing and with an open angle between upper and lower body circulation and oxygen supply is improved.
- When moving backwards, the backrest offers support and invites to pleasant stretching during your long working hours.

Multi™balans®

For an upright and strong posture, wherever you go

DESIGN: Peter Opsvik

Wood Options:

Natural or black lacquered beech

Measurements:

Multi

18.50in x 23.50in x 16.50-24.75in 47cm x 60cm x 42-63cm

Prices:

Aniline leather	\$999

- The sitting angle can be adjusted to your individual needs: the steeper it is the less pressure is on your spinal disks.
- Benefit from an upright, dynamic spine and an upper body in balance.
- This subtle activity strengthens your core muscles and reduces tension in neck and shoulders.
- The open angle between upper and lower body supports deep breathing and improves circulation.
- You can fold it and carry it with you wherever you go.

Wing[™]balans[®]

Enjoy active sitting on wheels

DESIGN: Peter Opsvik

Base:

Black plastic cross and black lacquered beech

Measurements:

Wing

22.75in x 22.75in x 20.75-28.25in 58cm x 58cm x 52-72cm

- The hidden tiling mechanism ensures natural movement and the armrests give support when needed.
- 360° degree rotation makes the chair even more flexible.
- Kokon Club is a compact lounge chair that blends in with most environments; the Scandinavian design and refined cross-stitching make it a unique piece of furniture both in private rooms and public spaces.
