

MOVE™

Design: Per Øie

unlimited mobility CONTROL

Our philosophy:

Variér® chairs are the product of a human idea. We make the human body central to design, learning it by heart. We know which positions promote relaxation, and where and how to support the body. The human body is designed for motion, and should never be still for too long. We make chairs that meet all these needs, and then we free our human imaginations to create bold, unconventional forms with perfect functionality.

Enjoy the ultimate in active sitting: put your body in the driving seat. Whether you're catching up on e-mails in the kitchen or multi-tasking over breakfast on the phone, the versatile Move lets your body go wherever it feels it needs to be.

With 360 degrees of movement to choose from, the height-adjustable Move is bound to have a position to suit you. This flexible standing support has a graded disc base, so its tilting angle can follow your body through a range of positions keeping the spine in its natural curvature and giving the body most freedom to move while strengthening back and abdominal muscles. Its saddle shaped seat is an essential element of the Move, making it impossible to slide off. This means you can really open up the angle between your torso and thighs, relieving the pressure on your spine and neck, allowing deeper breathing and thus improving concentration.

VARIÉR®
A HUMAN IDEA

MOVE™

CLASSIC AWARD FOR DESIGN EXCELLENCE
NORWEGIAN DESIGN COUNCIL

At desk or table: Achieve optimal energy and spinal alignment in a supported standing position.

In motion: If you stretch up or move downwards to reach something, the Move will follow your movement and provide support.

MODELS

Move/Move II

W 43 cm, D 43 cm

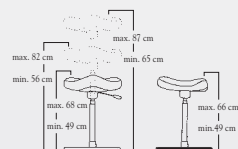

H: 49-68 cm (L), 56-82 cm (M), 65-87 cm (H)
